To students of the Master's program:

## **Financial Economics (Study and Examination Regulation–2017)**

(Matriculation from WS 17/18 to SoSe 19)

### **Curricular substitutability**

Dear students of the SPO version 2017,

The examination board of the Faculty of Economics and Management has decided to allow the **(partial) curricular substitution of the compulsory part** of the expiring study and examination regulations 2017 for the **summer semester 2020 according to table 1 below.**

This gives you the opportunity to take the listed alternative modules instead of the original compulsory modules "50008 Empirical Finance" and "50007 Open Economy Macroeconomics". Consequently, **two of the four modules** are to be successfully completed as **compulsory modules**. There is explicitly no equivalence in content between the modules.
